

POETRY.

From the New Yorker.
PRAY FOR ME.
IMITATED FROM THE FRENCH.

I.
Unto the hamlet, lone and fair,
A poet stole to die,
Whose spirit pined, through clouds of care,
To reach its native sky.
'And hark!' he said 'the evening bell
Tolls sweetly o'er the golden dell:
And shepherds, as ye bend the knee,
Pray that my soul may soon be free!

II.
But when a thwart the torrent's foam,
The sea leaves hurry on,
Then say, unto his native home
The weary man hath gone!
Then come unto this flowery shore,
And sing your wild songs as of yore;
But when the bell tolls o'er the sea,
Thank Heaven my weary soul is free!

III.
For this cold heart which scarcely beats,
Is sad as Autumn leaf,
Save when a gleam of Fancy cheats
The tremor of its grief;
Alas! my pilgrimage is short!
From birth to death the passion's short;
Yet from my late I would not flee;
Then pray, ye village maids for me.

IV.
And thou, my sweet, my only friend,
I may not long delay:
I vowed to love thee to my end—
My life is but a day;
Mourn maidens of the hamlet fair,
When daily, at the hour of prayer,
She kneels beneath my funeral tree,
And sadly sighs—"Pray for me!"

FALCONER.

Miscellaneous.

From the New York Courier.
THE TURF.
Long Island Races.

The great trial of speed between the North and South came off yesterday on the Union Course, L. I. Never since the great race between Eclipse and Henry, has the sporting world been so much excited. Confident of success, the partisans of the North had for some days past been most liberal in their bets in order to induce the Southern sportsmen to back their favorite steed, but without effect. The Southrons understood their game and played it well. Flushed with the anticipations of an easy victory the backers of the Northern horse at length were inconsiderate enough to propose large odds in the event; three to two were freely offered and as freely accepted, and bets to an enormous amount were frequently made. JOHN BASCOMB, a horse of great Southern celebrity, was the selected champion of that part of the Union, while Post Boy, of equal distinction on the turf was the chosen favorite of the Northern sportsmen.

At an early hour yesterday the steamboats crowded with vehicles of every description from the coach and four down to the humble cart, and with pedestrians of all sorts and sizes. The road from Brooklyn to the race course presented a most lively scene, and from the hours of ten to one, a living stream appeared to pass along it; the number of spectators on the Course is variously estimated from fifteen to twenty thousand and the scene was one of the most exciting ever witnessed. The backers of Post Boy were prodigal in their offers to bet, and found ready customers. At a few minutes before two o'clock the bugle sounded a call for the competitors, and the steeds were brought to the starting post. They both appeared to be in perfect condition. John Bascomb is a bright chestnut, and Post Boy a dark bay.—On the tap of the drum they started in beautiful style, and at a rattling pace, Post Boy taking the inner track. At the end of the first half mile Bascomb took the lead and kept it during the whole heat, coming at least fifty yards ahead of his antagonist. Neither of the horses appeared the least distressed. The backers of Post Boy still retained confidence in their favorite, and offered trifling odds that he would win the succeeding heat. Their apponents were not slow in accepting their offers, and bets to a considerable amount were again made on the event.

The time of running the first heat was seven minutes, forty-nine seconds, in the following proportions—

miles.	min.	sec.
1st	7	50
2d	1	56
3d	1	54
4th	1	57
	7	49

At the end of the thirty minutes, the horses were again summoned by the bugle to the starting post. Bascomb made a false start and ran nearly a quarter of a mile before he was stopped, and being again placed, at the usual signal both started in beautiful style, Bascomb taking the inner track, and leading. Never on any occasion, was a more beautiful race seen. Throughout the whole four miles the horses were close on each other. Occasionally Bascomb would increase his speed and leave his rival a few lengths behind, but by the free application of the whip and spur, Post Boy was urged to his former position, and although repeated efforts were made to push him ahead of Bascomb, they were always defeated by the consummate skill of the latter's rider.

The last mile was gloriously contested. Bascomb still continued the even, easy, fox-like pace with which he set out, and Post Boy close at his side straining every nerve to outstrip his adversary, but in vain; they reached the winning post almost neck to neck, but Bascomb still being ahead, was declared the winner. The period in which this heat was run

was seven minutes fifty-two and a half seconds, and the time of doing each mile was as follows:

miles.	min.	sec.
1st	2	00
2d	1	57
3d	1	56
4th	1	59 1-2
	7	52 1-2

The age of the horses is rising 5 years; both are beautifully formed, but Post Boy appears most powerful. Bascomb was rode by Willis, the groom of Col. Johnson; and Post Boy by Kirkpatrick, of great celebrity on the northern courses. It is generally admitted that a more beautiful race was never run on the Union Course, and every body, except the losers, and they bore their reverses with great philosophy, left the ground perfectly satisfied with the day's sport.

Singular Casualty.—A correspondent at Tazewell, communicates to us the following extraordinary and distressing intelligence. While Mr. William Walker, at Speedwell, Claiborne county, an elderly gentleman, was making a fence, he discovered a large spider, which he killed with a stone. In afterwards prosecuting his work, he had occasion to handle the same stone. A mortification shortly afterwards commenced in his hand, and increased until it produced his death in 8 or 10 days. At the time he handled the stone, he had a slight sore on his hand in which the mortification afterwards commenced, which was supposed to have come in contact with some poisonous matter from the spider left on the stone. Dr. Wm. Rogers, who attended Mr. Walker, and who also had a sore finger, died with a mortification in four days after it was discovered that his finger was affected. Our correspondent further informs us, that a number of those who assisted in laying out Mr. Walker, have been seriously afflicted; some have been very low, but only the two deaths above mentioned had taken place.—*Knoxville Register.*

NEWARK, (Ohio), May 28.

A most atrocious, cold-blooded murder, was committed in Fairfield county, a short time since, by a man named Wm. Rogers, who resides about three miles from Lancaster. Work, it appears, from a letter from Lancaster, to a gentleman in this place, had been suspected of stealing property of a trifling amount in value, and a boy who lived with him was the principal witness against him. For the purpose, it is supposed, of preventing him appearing against him on trial, he destroyed his life, by choking him while in bed, and afterwards buried his body in a field. Search was made for it, and the search relinquished, and again renewed, in consequence of Work directing a ploughman not to plough in a particular part of his field, where the body was found.—*Advocate.*

The Indian's Panacea.

FOR the cure of Rheumatism Scrofula or King's Evil, Gout, Sciatica, or Hip-Gout, Incurable Cancers, Salt Rheum, Syphilitic and Mercurial diseases, particularly Ulcers and painful affections of the bones. Ulcerated Throat and Nostrils, Ulcers of every description, Fever sores and Internal Abscesses, Fistulas, Piles, Scald-head, Scurvy, Bites, Chronic, Sore Eyes, Eye-ropes, Bloches, and every variety of contagious Affection, Chronic Catarrh, Headache, proceeding from an acid humor; Pain in the Stomach and Dyspepsia, proceeding from vitiation; Affections of the Liver, Chronic Inflammation of the Kidneys, and general debility, caused by a torpid action of the vessels of the skin. It is singularly efficacious by renovating those constitutions which have been broken down by injudicious treatment, or juvenile irregularities. In general terms, it is recommended to all those diseases which arise from impurities in the blood, vitiation of the humors, or what ever name or kind.

Some of the above complaints may require some trifling assistant applications, which the circumstances of the case will dictate, but for a general remedy or Purifier, to remove the cause, THE INDIAN'S PANACEA will generally be found sufficient.

To the Public.

How true it is, that modern Physicians—in their ambition to excel in their profession; to explore the vast fields of science by the aid of Chemistry, and seek out new remedial agents; in short to arrive at perfection in the practice by means of ART alone,—overlook and neglect, beneath their notice the rich and bounteous stores of medicine, which the almighty has caused to spring out of the earth in every clime! And how much more true it is, that while the American Physician looks to foreign countries for many of his most common and necessary articles perpetually changing as they are the dictates of fashion or folly he is surrounded in his own country with an endless profusion.

The congeniality, efficiency and safety of vegetable remedies over mineral, may be estimated by contrasting the ancient practice with the modern; or, to bring it more immediately under our own observation, the Indian practice with that of the whites. Who, in America, has not known or heard of repeated instances wherein some decrepit, unpretending, remote Indian by means of her simple remedies alone, has effected the most rapid and astonishing cures, after the whole Materia Medica of the common practice, directed in the most skillful manner has failed? And who has not been surprised at beholding the comparative ease and facility with which the Indian frees himself of any disease, and at the almost total absence of chronic disease among them. Who has ever heard of an Indian with a constitution broken and ruined by ill-treatment? And can a doubt exist, that this happy exemption of the savage from most of the ills which the flesh of civilized man is heir to is chiefly owing to the more genial and safe remedies which he employs. This astonishing difference in success, is a fair exemplification of the infinite superiority of the simple and safe means of cure which God has created for the benefit of his children, over those which the pride and the art of man have invented.

From a long residence among a portion of the aboriginal inhabitants of this country, and an intimate acquaintance with the methods of cures of some of their most successful practitioners, the proprietor of the "THE INDIAN'S PANACEA," acquired a knowledge of some of their most powerful and favorable remedies. From these he selected such as were most efficacious and appropriate, and after various experiments to test their principles and strength he has combined them in the form here presented, as the most perfect and beneficial for the purpose for which it is recommended.

The proprietor offers this preparation to the public, with the consciousness that he is placing within its reach, a remedy capable of relieving many of his afflicted fellow beings, who are suffering under the various chronic and obstinate complaints to which it is applicable. To such it will prove of incalculable value, as the means, and in many cases the only means of relieving their sufferings and restoring them once more to health and happiness. This is not offered as a common remedy, that may perchance be equally good with many others now in use, but as one which is capable of saving life in many extreme cases, when all the usual remedies fail. Thus it has done repeatedly; and this is the reputation it has obtained wherever it has been introduced.

It is only about three years since this preparation was first presented to the public: but in that short space of time, some hundreds of persons might be found, who would solemnly declare that they believed that their lives were saved by it, and in most cases after they had tried many perhaps all the common remedies in vain. Wherever it is known it is rapidly coming into use, and this affords the most substantial and convincing proof of its merits.

The value of the Panacea, is most conspicuous in those long standing and obstinate syphilitic and mercurial affections which have defied all other remedies, and particularly in those cases where mercury has been so lavishly used as to cause distressing pains in the bones, nodes, mercurial ulcers, derangement of the digestive organs, &c. These it completely removes and in all cases entirely eradicates the disease and the effects of mercury, renovates the constitution, and leave the patient sound and well. In Rheumatism and in ulcerated sore throat, its happy effects are not less apparent, giving almost immediate relief.

Taken in proper doses, THE INDIAN'S PANACEA operates as an alternative, and detergent; a diaphoretic, diuretic and laxative; an antispasmodic and anodyne, and in proper cases, as a stomachic and emmenagogue. Generally expressed, it increases all the secretions and excretions, gives tone to the stomach, and excites action in the glands in a particular manner. From these principles its operation may be understood.

This medicine has been found highly useful in many ambiguous diseases not here specified, and it has been used with wonderful success as a Spring and Fall purifier, by those who are subject to complaints of the chest, and whose constitutions require new vigor. Such persons would do well to use two or three bottles in small doses. Wherever a diet drink is considered necessary, the Panacea, taken in a small dose, will answer all its purposes, in much less time, at less expense, and in a far more agreeable manner, than the common diet drink.

The following certificates, out of hundreds similar which might be procured, are given to show the effect of THE INDIAN'S PANACEA, in the various complaints therein mentioned; and also to exhibit in the most satisfactory manner its superiority over the symptoms in common use.

CASES OF RHEUMATISM.

CHARLESTON, Nov. 15, 1831.
During the last winter and spring, I was afflicted with a very severe and distressing Rheumatism occasioned by exposure in bad weather. I now take great pleasure in stating, that six bottles of the Indian's Panacea, restored me to perfect health, and I confidently recommend it to all similarly afflicted.

JOHN FERGUSON, King-st.

CHARLESTON, March 27, 1832.
I was seized about three years since with a distressing Rheumatism caused by taking a severe cold while under the influence of mercury, and which has disabled me from business nearly ever since. During this period I have been a patient in the Marine Hospital in this City, upwards of four months nearly, and the same length of time in the Baltimore Hospital, and tried almost every remedy, with little benefit. On the 10th of February and at that time scarcely able to move about upon crutches, I commenced the use of The Indian's Panacea. In one month I found myself entirely cured from the pain, and am now happy to state that I feel myself perfectly well.

WM. TUCKER, 13 Market-st.

CURE FOR SCROFULOUS ULCERS.

NEW YORK, Sept. 10, 1830.
This may certify, that in the fall of 1825, I was seized with a swelling in my neck and face, which afterwards ulcerated and became large ghastly ulcers in my neck. After trying several Physicians to no advantage, I went to Philadelphia, and placed myself under the care of Drs. Physic and Beach, when, after repeated salivation to no effect, I was pronounced totally incurable. Afterwards I took twenty bottles of Swain's Panacea and eight bottles of Potter's Catholicon, with no material benefit. Despairing of life, which had now become a burthen to me, I returned to my parents in New York in 1829, and gave myself up to a lingering death. Hearing of the great success of THE INDIAN'S PANACEA, however, in cases similar to my own, I was persuaded to try it, as a last resort. To my great surprise as well as satisfaction, I soon found myself rapidly recovering, and upon taking seven bottles, the ulcers healed and became perfectly well in the course of two months, and have remained so ever since. I make this statement and wish it published for the benefit of those who are suffering under similar scrofulous or syphilitic affections, that they may know what has cured one who has suffered every thing but death, and who considers his life saved by the above syrup.

WM. HINMAN.

The above Medicine may be had at
